**Dr. J. Patrick Daugherty and Edie Hand**

As a medical oncologist, scientist, and theologian, Dr. Daugherty is familiar with many who are living well while living longer. Along with co-author Edie Hand, an acclaimed celebrity chef, author, business woman, and a three-time cancer survivor, they provide stories to inspire hope, faith, meaning and purpose.

#### STORY / SYNOPSIS:

*This is a book of stories about average people. Their common bond? The enemy of cancer and the subsequent suffering associated with it. Their common gift? Conquering cancer – not necessarily by surviving disease free, but by finding benefit in their experiences. Extraordinary lessons are to be learned from these ordinary people – not in dying, but in living. They teach us to live a meaningful life. This book's purpose is to make some of their lessons available to the countless thousands diagnosed with cancer, and to the loved ones, families and friends who are all challenged to accept "The Unexpected Gift" of cancer.*

#### READERS:

There are few lives untouched by cancer. This book is not only for those who have been diagnosed with the disease, but also for the families and friends who love them. Caregivers will also appreciate the encouragement found within these pages. *The Unexpected Gift* indeed makes a thoughtful gift for sharing with anyone experiencing a life challenge.
